

New Update

Sunday Success

What are we celebrating this week?

A new client!

We've had a fantastic win with a new client this week and we can't wait to get started!

This client has been working hard on producing and providing their internal functions with a change function and very comprehensive delivery framework.

They had 3 key problems though:

1. Ensuring they had access to the right people to support this function
2. Ensuring they had the right quality of people to support the function
3. Ensuring the internal team followed their comprehensive delivery model.

We jumped straight in to find a way of supporting their needs in the short term and to get the right outcomes in the long term: the right people, the right quality and adherence to their delivery framework.

Their feedback to us? "You are the only consultancy that really took the time to understand what our problem is and to use your project professional expertise to work with us to try and solve it. And that is why we've chosen you to partner with".

After just a couple of months in discussion, we'll start a small team in November up until April and then ramp up into 2022 with their future requirements.

A fantastic opportunity to do what we do best: help clients delivery great projects.

And 2 more new starters

Deepak Kachole

This week Deepak joined the team at Tesco Bank as a Lead Cloud Engineer. He's previously worked with various financial services institutions, and is a skilled AWS Certified Solution Architect.

Michaela Jennings

And Michaela joined the Handelsbanken team as a Change Manager. She has a track record in change delivery, and extensive experience also within the financial services sector.

Welcome to the team Deepak and Michaela, we can't wait to see what you can do!

Want to give kudos to somebody for their great work? Let us know and we might mention them in next weeks' email!
